

The KLOPSTEG Seminar Series in SCIENCE AND HUMAN CULTURE Presents:

Vital Objects: A History of Essential Medicines in Global Health

Jeremy Greene

(History of Medicine, Johns Hopkins)

Monday, May 12, 2014

4:00 - 5:30 P.M.

University Hall Room 201

SCIENCE HAS MANY NEW AND POWERFUL WEAPONS AGAINST DISEASE

This man's disease, yaws, will be cured by this single injection of penicillin. WHO/UNICEF teams have already examined 20 million people and treated 5 million sufferers. The cost of curing this disease is less than \$1 (U.S.) per person.
